

Colin Fitz-Maurice

/* Goodworld, Senior Full Stack Dev June 2016 - Present */
<https://goodworld.me>
Lead Developer

Goodworld is a Washington, D.C. based financial tech startup changing the way people give to charity via social media, with hashtag donations, as well as a provider of conventional fundraising tools (donation buttons, forms and embeddable widgets).

- Working with PHP, Laravel, TWIG, MySQL, Amazon Web Services (RDS, ELB, SES, SQS, EC2, Route 53), Stripe, HTML5, CSS3, SASS, and jQuery and React.
- Responsible for the frontend build of the website and CSS framework that spans all services and products and custom emails
- Implemented an immutable general ledger framework for a referral credit grant system that allows donors and referral recipients who signup to receive credit to give to a charity of their choice.
- Assisted in development of a React based donation widget that can be embedded on any website to allow nonprofits to accept donations without navigating away from their own site

/* LifeZette, Ingraham Media Group May 2015 - June 2016 */
<http://www.lifezette.com>
Lead Developer

Part of a two man team, second to the CTO. I am responsible for the management of the entire LifeZette code base (frontend and backend), and all UI/UX design choices.

- Created a custom WordPress theme for www.lifezette.com that is supported by 9 custom plugins to extend the functionality of the CMS. Listed below:
 - The registering and management of JSON API endpoints for website content
 - Shortcode Rendering Engine for server side performance delivered to the mobile app
 - A Library of shortcodes to support the Editorial Staff's enriched content needs
 - Fully SCSS'ed stylesheets with modularity across the mobile app as well
 - A plugin containing a library of methods for onboarding and managing new advertising partners on our platform
 - Engineered LifeZette's video platform, synchronizing our WordPress database with a third party API for web and app playback
- Designed, planned and coded LifeZette's mobile app built on the hybrid Ionic platform to support iOS and Android, including all graphics and icons

/* Fitz Creative, LLC July 2011 - Present */
Sole Proprietor
<https://fitz-maurice.com>

Providing comprehensive and cost-effective graphic design, branding and web design needs. All websites are built with strict HTML5, CSS3 and JavaScript standards featuring mobile-first responsive engineering.
